

Dear Parents/Guardians,

We hope your children use some of their vacation time to pursue hobbies or to try new things! And certainly, there should be time to lounge and relax. However, students should use some of the time during the summer break to shore up their study skills and prepare for the challenges of the next grade. To help the students, the Upper School teachers have decided to introduce a summer workbook. While the workbook contains thirty lessons, students only must complete 23. Of course, any additional work is encouraged!

All educational standards require students to be able to read and comprehend nonfiction passages at grade level, write objective summaries of nonfiction text, and use context clues to determine the meaning of unfamiliar words. *Summer Solutions Study Skills* addresses these concepts, along with others, such as developing organizational skills, interpreting visual information in charts, graphs, and timelines, solving analogies, recognizing cause/effect, note taking with graphic organizers, outlining, and writing a report. ***By completing just one lesson three days a week, students enter the next grade ready to begin learning new material right away.***

Please see the flyer for ordering information. You can order the book online and have it delivered right to your home! Our school code is H02176MOA. Please order the Study Skills Book for the grade your child has just completed!.

Remember, review works best if it spread over the entire summer and not done quickly in one week! Thank you for checking with your child to be sure that he or she is making the most of this opportunity.

Respectfully,  
The Upper School Staff
